

EARLY YEARS MATHS

Challenge:

- Roll a die numbered 1-6.
- Count the spots.
- Can you find that number anywhere in **your home**?
- Ask an adult to help you take a photograph and submit it below.

Have fun and do this as many times as you want.

Going Further

- Roll two dice.
- Count how many spots you have altogether on both dice.

Helpful Hints

- If you roll 3, you might look around and find a number 3 on a clock.
- If you roll 2, you might look around and find a number 2 on the bottom of your shoe.
- Numbers are everywhere. Keep your eyes peeled for more numbers even when you are outside.
- Talk to your family about them.
- What is one more than your number?
