

ROLL TWO DICE

Roll two dice

They always land on the same number – this is known as a double – count the spots on both dice.

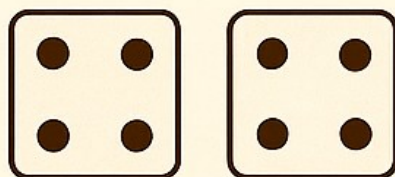

What is your total?

How many different totals can you make?

What is the smallest and largest total that you can make.

Helpful Hints

You roll the dice and get two 2s or double 2 like this

If you count the spots, the total is 4. $2+2=4$ or double $2=4$

Roll the dice again and get two 5s or double 5.

How many spots do you have in total now?

Now find out all of the possible totals you could make from rolling two dice when they both land on the same number.
